Patent No. 6680369

GENERAL INFORMATION:
APPLICANT: Beraud, Christophe
APPLICANT: Craven, Andrew
APPLICANT: Tu, Ming
APPLICANT: Tu, Ming
APPLICANT: Davies, Katherine A.
TITLE OF INVENTION: NOVEL MOTOR PROTEINS AND METHODS FOR THEIR USE
FILE REFERENCE: 202052-001410US
CURRENT APPLICATION NUMBER: US/09/883,096
CURRENT APPLICATION NUMBER: US/09/683,096
CURRENT APPLICATION NUMBER: US 09/594,655

PRIOR FILING DATE: 2000-06-15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1021 TCCAAGGAGGTGA 1033

Patent No. 638841

GENERAL INFORMATION:

APPLICANT: Berand, Christophe

APPLICANT: Bread, Richard

TITLE OF INVENTION: No. 636841el motor proteins and methods for TITLE OF INVENTION: their use

TITLE OF INVENTION: L1045

CURRENT PILING DATE: 2000-11-27

PRIOR PILING DATE: 2000-07-21

NUMBER: OF SEQ ID NOS: 2

SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              72;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Length 897;

Submitted (13-MAY-2003) BD Biosciences Clontech, 1020 East Meadow Circle, Palo Alto, CA 94303, USA This CDS clone is a part of a collection of human full length expression clones generated by BD Biosciences Clontech and the Harvard Institute of Proteomics. Each CDS has been cloned in two forms; with and without stop-codon (to allow fusion with C-terminal tag). The CDS has been directionally cloned using BD In-Fusion(TM) cloning system between the Sall and HindIII sites of the pDNM-DUAL vector. Additional sequences in the clone: 'ACC' after Sall site and before 'ATC' to provide Kozak consensus sequence; 'GG' after last codon and before HindIII site to maintain reading frame. Incation/Qualifiers
Kalnine, N., Chen, X., Rolfs, A., Halleck, A., Hines, L., Eisenstein, S., Koundinya, W., Raphael, J., Moreira, D., Kelley, T., LaBaer, J., Lin, Y., Phellan, M. and Farmer, A.

This CDS clone is a part of a collection of human full length expression clones generated by BD Biosciences Clontech and the Harvard Institute of Proteomics. Each CDS has been cloned in two forms: with and without stop-codon (to allow fusion with C-terminal tag). The CDS has been directionally cloned using BD In-Fusion(TM) cloning system between the Sall and Hindrill sites of the PDNR-DUAL vector. Additional sequences in the clone: 'ACC' after Sall site and before 'ATG' to provide Kozak consensus sequence; 'GG' after last codon and before Hindlil site to maintain reading frame. Clone distribution: http://bioinfo.clontech.com/orfclones.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             135
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    195

Clone distribution: MGC clone distribution information can be found through the I.M.A.G.E. Consortium/LLNL at: http://image.llnl.gov Series: IRAL Plate: 8 Row: f Column: 1
This clone was selected for full length sequencing because it passed the following selection criteria: matched mRNA gi: 6453817.

Location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              /db_xref="Locusid:3835"

It currently consists of 4 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
